DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 7, 19, 22 and 23 stand rejected under 35 U.S.C. 102(b) as being anticipated by PCT publication to Briscoe (cited in IDS).

The publication to Briscoe discloses vehicle adapted to ride on the surface having a head assembly 8, an actuator 10 supporting the head assembly. The actuator including a pressure sensor detecting a position of the head assembly relative to the surface, a head position control 28 responsive to input from an operator, and a driving circuit 26,31 (page 11) responsive to the head position control and responsive to the sensor for energizing the actuator to raise and lower the head assembly.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Application/Control Number: 09/621,034

Art Unit: 1744

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 6. Claim 18 stands rejected under 35 U.S.C. 103(a) as being unpatentable over PCT publication to Briscoe.

Briscoe discloses the claimed invention except for the vehicle having pneumatic tires.

Briscoe is silent as to what type of tire is employed in the cleaning vehicle. It is know by those skilled in the art that pneumatic tires are used in surface cleaning vehicles. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide pneumatic tires to the vehicle of Briscoe as either pneumatic or rigid tires are considered mechanical equivalents.

Allowable Subject Matter

7. Claims 1-6, 8-17, 20 and 21 are allowed.

Application/Control Number: 09/621,034

Art Unit: 1744

Response to Arguments

- 8. Applicant's arguments filed 3/5/2002 have been fully considered but they are not persuasive.
- 9. Applicant argues that the brush pressure control system of Briscoe is not the same as a system that adjusts the position of the head assembly relative to the surface. The examiner believes it is. When the operator sets a predetermined pressure, the brush is lowered and forced into contact with the floor until that pressure is achieved. For a given brush, this pressure will be achieved when the brush head is held a certain distance from the floor. The microprocessor 31 holds this pressure/distance at a constant value. If the pressure exceeds the set value, the brush will be lifted to reduce the pressure. Hence, a constant height between the brush and the floor is achieved. Certainly Briscoe does not disclose a system that adjusts the position of the brush assembly independent of the length and stiffness of the brushes. However, that concept has yet to be claimed in the above rejected claims.

Conclusion

10. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1744

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Terrence R. Till whose telephone number is (703) 308-1592. The examiner can normally be reached on Mon. through Thurs. and every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert J. Warden can be reached on (703) 308-2920. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
